

FOR IMMEDIATE RELEASE

## Veeva Announces Oncology Data Solution to Identify and Engage Scientific Leaders

*Veeva Oncology Link helps medical and commercial teams build stronger relationships with experts across the global oncology community*

**BARCELONA, Spain — 25 October 2017 — Veeva Systems** (NYSE: VEEV) today announced **Veeva Oncology Link**, an enterprise data solution to centralize insights and intelligence on scientific leaders in oncology. Veeva Oncology Link consolidates thousands of global experts and millions of activities, including publications, clinical trials, and events, in a single, complete source of oncology data. Now medical affairs and commercial organizations can better plan and engage top industry thought leaders and create deeper relationships with the global oncology community.

Oncology is one of the largest, most diverse, and fastest-growing specialty areas in life sciences, and the ecosystem of oncology experts is equally large and complex. Information about key scientific leaders is typically managed in disparate data sources that quickly become out of date. This makes it difficult to gain an in-depth understanding of oncology expert profiles and interests.

Veeva Oncology Link provides a single, global data source to bring together unique insights on scientific leaders for the life sciences industry. Companies can better identify and reach top scientists and researchers that are key to the successful product development and launching of new cancer treatments.

Rich, up-to-date profiles provide visibility into oncology experts' interests, affiliations, publications, trial activity, and partnership opportunities. Data is continually kept current by utilizing both data science and a team of oncology specific Veeva data stewards.

“Building valued scientific partnerships with the right experts is key to bringing oncology products to market effectively and improving patient outcomes,” said Kilian Weiss, general manager of Veeva Oncology Link. “Veeva Oncology Link provides critical market insights across all major tumor types around the world so the industry can build stronger relationships with the global oncology community.”

Veeva will host an Oncology Forum at the **Veeva European Commercial & Medical Summit** on 29 November in Madrid. The forum will feature leading scientists, technologists, and life sciences executives for an in-depth discussion on oncology innovation. For more information or to register your interest, please visit the **Oncology Forum** website.

Veeva Oncology Link is planned for availability in the summer of 2018.

### Forward-looking Statements

This release contains forward-looking statements, including the market demand for and acceptance of Veeva's products and services, the results from use of Veeva's products and services, and general business conditions, particularly in the life sciences industry. Any forward-looking statements contained in this press release are based upon Veeva's historical performance

and its current plans, estimates, and expectations, and are not a representation that such plans, estimates, or expectations will be achieved. These forward-looking statements represent Veeva's expectations as of the date of this press announcement. Subsequent events may cause these expectations to change, and Veeva disclaims any obligation to update the forward-looking statements in the future. These forward-looking statements are subject to known and unknown risks and uncertainties that may cause actual results to differ materially. Additional risks and uncertainties that could affect Veeva's financial results are included under the captions, "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the company's filing on Form 10-Q for the period ended 31 July, 2017. This is available on the company's website at [veeva.com](http://veeva.com) under the Investors section and on the SEC's website at [sec.gov](http://sec.gov). Further information on potential risks that could affect actual results will be included in other filings Veeva makes with the SEC from time to time.
