# Unifying Quality Management with Veeva Vault Quality

Modernize global quality management with the Vault Quality Suite to bring together processes, content, and training applications on a single cloud platform

Vault Quality Suite

QMS	Produce Surveillance	QualityDocs	Validation Management	Station Manager	Training	LearnGxP

Vault Platform

New market demands, increasingly complex supply chains, shifting regulations, and changing workforce needs are forcing medtech manufacturers to re-evaluate disjointed legacy systems and processes. These disconnected systems create gaps between manufacturing and quality management processes, making it difficult to align with rapidly-changing regulations and hit time-to-market goals.

Veeva Vault Quality Suite serves as the single source of truth for all of your quality needs, enabling medtech companies to streamline and harmonize quality processes, content, and training for greater visibility and control across the enterprise. Vault Quality includes purpose-built industry cloud applications delivered with robust medtech success practices. The modern user experience helps drive user adoption and enables rapid access to validated data and content to accelerate the business decision-making process.

Vault Quality Suite Benefits

- **Improve GxP quality and compliance:** Reduce compliance risk by automating workflows and visibility into content status and processes to enable effective SOP and quality event management

- **Global alignment with end-to-end control:** Easily bring departments, sites, suppliers, contract manufacturers, and other partners into continuous improvement quality processes

- **Enable real-time risk-based decisions:** Improve risk visibility across products and processes with a unified approach to risk management

- **Rapid time-to-value:** Increase operational efficiency with built-in best practices and industry specific innovations, released three times each year

Vault Quality Suite Includes

Vault QMS

Unify quality management business processes. Vault QMS spans the full spectrum of quality business processes so you can easily track and manage nonconformances, CAPAs, audit management, complaints, change controls, quality risk management, and supplier quality management.

Vault Product Surveillance

Fully automate electronic health authority submissions and non-electronic submission outputs to ensure timely adverse event reporting. Enable efficient complaint handling to improve patient outcome and product innovation through seamless unification with quality and regulatory processes.

Vault QualityDocs

Collaboratively author, review, and approve documents in a single, secure application. Provide all parties with direct access to a single source, eliminating compliance risks. Enable efficient content control processes and promote improvement through pre-defined lifecycles and automated workflows.

Vault Station Manager

Provide manufacturing operators with up-to-date content directly on the floor via mobile application. Deliver documents and videos, including critical work instructions and procedures, from Vault QualityDocs to tablets located at manufacturing stations.

Vault Validation Management

Provide documentary evidence demonstrating a procedure, process, or activity to maintain the desired level of compliance at all stages.

Vault Training

Manage quality and compliance-related training in a validation-ready learning management system. Seamlessly access critical content managed in Vault QualityDocs to complete training tasks for traceability and transparency of training requirements.

Vault LearnGxP

Provide your team with an extensive online training content library of more than 170 accredited courses and 500 learning videos to ensure qualification, job-readiness, and compliance with regulations and industry standards.
