

Veeva Vault for Clinical Operations

Accelerate trial execution

Veeva offers the industry's first and only suite of unified clinical operations applications—including study start-up, eTMF, CTMS, and payments on a single cloud platform—to accelerate trial execution and deliver real-time visibility. Key to this first-ever unification of clinical operations systems is Veeva Vault Platform's unique ability to manage both content and data, eliminating system silos, enabling true end-to-end clinical trial processes. For the first time, life sciences companies can unify clinical operations on a single platform to create a single source of truth and streamline clinical trials from study start-up to close.

Vault Study Startup

Vault Study Startup accelerates time to site activation by connecting global teams and enabling best practices for managing country and site startup processes. Content-intensive startup processes and milestone maintenance activities are managed in a single system, providing unparalleled insight and efficiency. Study startup and TMF content and data are seamlessly accessed across teams, systems, and studies.

Vault eTMF

Vault eTMF provides real-time inspection readiness, full visibility into TMF status, and access for all study partners. Sponsors get the clarity they need to oversee trials more effectively. CROs gain the flexibility and control required to operationalize their SOPs and efficiently populate the eTMF. Auditors get easy online access with a dedicated role. And sites receive a simple and efficient means to interact with CROs and sponsors. Vault eTMF promotes the highest levels of TMF quality, access, visibility, and control.

Vault CTMS

Vault CTMS is the only modern cloud application that enables life sciences companies to unify clinical information and processes, streamline trial management, and gain complete visibility across the trial portfolio. With one seamless system of record for clinical master data, study information, and simple navigation across clinical trial processes, organizations can make faster, more informed decisions into the performance and efficiency of clinical trials.

Vault Payments

Vault Payments speeds payments to clinical research sites and provides financial visibility to all study partners. Designed to support complex trials, Vault Payments enables sponsors and CROs to pay sites faster and more accurately.

Key Capabilities of a Unified Application Suite

The only clinical suite that combines EDC, coding, study start-up, eTMF, CTMS, payments, and site document exchange delivering clinical trial excellence across clinical operations and data management.

Single application platform

Veeva's suite of clinical applications is built on the Veeva Vault Platform, the only content management platform with the unique capability to manage both content and data, eliminating system silos, and streamlining end-to-end clinical trial processes.

Single source of truth for content and data

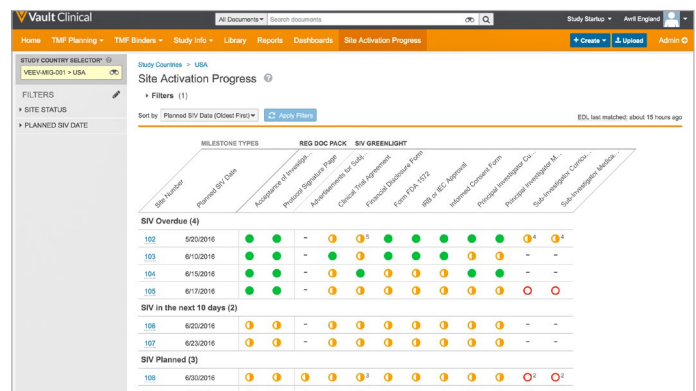

Enter trial data and content once and leverage it across Vault Study Startup, Vault eTMF, Vault CTMS, and Vault Payments applications. Access and share the same content and data with all study partners, ensuring timeliness and greater accuracy.

Single source for clinical master data

Ensure high quality data across clinical applications with one system of record for master study, study country, and study site information.

Unified view

Optimize your development portfolio by making faster and more informed decisions with a comprehensive and accurate view of trial status.

Veeva Vault Clinical Suite

Veeva Vault Clinical Suite is the industry's first cloud platform that combines EDC, coding, data management, study start-up, eTMF, CTMS, and payments to deliver the most comprehensive suite of clinical cloud applications. For the first time, life sciences companies can unify clinical operations and data management with a single platform to create a single source of truth and streamline clinical trials from study start-up to close.

Veeva's suite of clinical applications is built on the **Veeva Vault Platform**, the first cloud platform built from the ground up to meet the rigorous usability, scalability, performance, validation, and security requirements of the life sciences industry. With a modern user experience and cloud pace of innovation, Vault Clinical Suite transforms clinical operations and clinical data management.
