

FOR IMMEDIATE RELEASE

Batavia Biosciences Optimizes Global Quality Assurance with Veeva Vault Quality Suite

Global CDMO boosts GxP compliance and inspection readiness with Veeva quality applications

PLEASANTON, CA — September 15, 2022 — Veeva Systems (NYSE: VEEV) today announced **Batavia Biosciences** selected **Veeva Vault Quality Suite** to optimize its global quality assurance (QA), unifying content, processes, and training management on a single platform. Batavia Biosciences will also benefit from real-time insights that support ongoing QA improvements and inspection readiness.

“As our development footprint grew globally, we needed to optimize our QA approach to better meet future needs,” said Jolanda van Vliet, director of quality assurance, Batavia Biosciences. “Bringing our QA onto Veeva’s cloud-based platform enables us to centrally manage quality documentation and training, facilitate collaboration among authors, and improve reaction time to quality events.”

Based in the Netherlands, Batavia Biosciences is a full-service contract development and manufacturing organization (CDMO) specializing in viral vaccines, virotherapy, and protein vaccines. With **Veeva Vault QMS**, Batavia Biosciences can centrally manage QA processes to better ensure GxP compliance, while **Veeva Vault QualityDocs** automates workflows and audit trails, simplifying document management, updates, and review processes. **Veeva Vault Training** will further help the CDMO ensure role-based qualifications.

“It is a privilege to partner with Batavia Biosciences to support their launch of a fully digital QA system and boost inspection readiness,” said Sofia Lange, director strategy, Vault Quality and Manufacturing at Veeva. “With the addition of Vault Quality Suite, Batavia Biosciences now has a scalable foundation that will strengthen its QA processes and oversight across operations.”
