

# Modernize Your Clinical Trials with CTMS Transfer

CTMS Transfer automates the daily transfer of relevant Veeva CTMS data from a CRO Vault to a Sponsor Vault providing near real-time access to data for Sponsors, without custom integrations or manual effort.

## 01. Improved Compliance

- **Strengthened sponsor oversight:** Enables sponsors to demonstrate evidence of study oversight in compliance with evolving regulatory guidelines.

## 02. Automated CTMS Data Transfer

- **Streamlined data practices:** Minimize manual data entry, eliminate redundant processes, reduce errors, and ensure data consistency.
- **Optimized resources:** Reallocate time spent on building custom reports and reconciling data to support more strategic initiatives.

## 03. Enhanced Collaboration

- **Shared view of critical data:** Foster transparency and proactive communication between Sponsor and CRO.
- **Faster issue resolution:** Identify and address challenges together quickly and efficiently.
- **Informed decision-making:** Leverage real-time data for better insights.

## 04. Accelerated Timelines

- **Faster study start-up:** Initiate trials more rapidly and gain real-time visibility into trial progress.
- **Rapid delivery of results:** Accelerate the path to discovery and patient benefit.

## 05. Focused Strategic Activities

- **Drive innovation:** Empower your team to focus on data analysis, patient engagement, and scientific breakthroughs.
- **Minimize technical debt:** Drastically limit custom tech integrations, including ongoing maintenance, and focus on strategic technology projects.
